

REMARKS/ARGUMENTS

Claims 32-43 are pending in the application. Claim 32 has been amended, new claims 44 and 45 have been added. No new matter has been added. Reconsideration of the claims is respectfully requested.

New claims 44 and 45 have been added. With the addition of these claims, if an allowance is not granted in the next action, a final rejection would be inappropriate.

Further, claim 45 is a method claim and the examiner is hereby requested to consider this response as a **Suggested Restriction Response** (SRR forms not yet available from the USPTO).

In paragraph 2 on page 2 of the Office Action, claims 32-33 and 37 are rejected under 35 U.S.C. § 112 second paragraph for being indefinite and failing to point out and distinctly claim the subject matter which Applicant regards as the invention. The objection was to antecedent basis in claim 32 and that has been corrected.

In paragraph 9 on page 3 of the Office Action, claims 32-38 and 40-43 are rejected under 35 U.S.C. §102 (e) as being anticipated by MacWilliams (US Patent No. 6385860).

In paragraph 11 on page 5 of the Office Action, claim 39 is rejected under 35 U.S.C. § 103(a) as being unpatentable over MacWilliams (US Patent No. 6385860).

The rejections under section 102e and 103a are unsustainable because 35 USC sec 103(c) eliminates the MacWilliams reference as prior art.

With respect to sec 103(c), section 102(e) states:

the invention was described in (1) an application for patent, published under section 122(b) [35 USC 122(b)], by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) [35 USC 351(a)] shall have the effects for the purposes of this subsection of an application filed in the United States only if the international application designated ...

Section 103(c) states:

Subject matter developed by another person, which qualifies as prior art only under one or more of subsections (e), (f), and (g) of section 102 of this title [35 USC 102], shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the claimed invention was made, owned by the same person or subject to an obligation of assignment to the same person.

In the present case, the cited prior art was assigned at filing to the same assignee as the present invention. A copy of the assignment document (or reel-frame number) is supplied.

There are other reasons why MacWilliams is not applicable prior art but we do not need to reach these reasons in view of Sec 103(c).

In view of the amendments and reasons provided above, it is believed that all pending claims are in condition for allowance. Applicant respectfully requests favorable reconsideration and early allowance of all pending claims.

A petition for a three month suspension of this case is also filed herewith in order to allow for an in person interview with the examiner.

If a telephone conference would be helpful in resolving any issues concerning this communication, please contact Applicant's attorney of record, Michael B. Lasky at (952) 253-4106.
